Art Unit: 3632

This is an office action for serial number 10/730,473, entitle adjustable Musical Instrument Stand, filed on December 8, 2003.

Election/Restrictions

Claims 10-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 29, 2004.

The applicant has indicated that claims 3-6, 8, 22-26 are drawn to the elected species I figures 1 and 2 however, the examiner does not agree with this election. Claims 3-6, 8, 22-26 are drawn to a non-elected species since the elected species I does not disclose a adjustment mechanism being hydraulic; a winch, cable, and pulley mechanism; or a pump and a piston. The examiner has withdrawn claims 3-6, 8, and 22-26 from further consideration as being drawn to a non-elected species.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3632

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7, and 19-21 are rejected under 35

U.S.C. 102(b) as being anticipated by Pierce et al. (Pierce)

5,483,903. Pierce discloses a base member (14), a stand member (26), an instrument support (12 and 25), a means for moving/adjustment mechanism being a motor (46), a screw drive (33 and 36).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pierce 5,483,903 in view of Olivier 5,937,764. Pierce discloses all of the limitations of the claimed invention except for the means for moving comprising a control manipulated by foot. Olivier teaches that it is known to have a means for moving being a motor comprising a control

Art Unit: 3632

manipulated by foot (50). It would have been obvious to one having ordinary skill in the art to have modified Pierce to have included the control being manipulated by foot as taught by Olivier for the purpose of providing ease of moving the table up and down allowing the user's hands to be free to perform other tasks.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

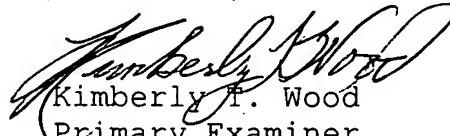

The prior art discloses conventional elevating tables/platforms.
